Summary

- Proven ability to jump into new projects and learn new technologies quickly.
- Proven ability to quickly create prototypes (proof of concept prototyping).
- Proven track record of initiating and delivering successful projects and SaaS products.

Recent Experience

Presshub.io – San Francisco, CA

Founder, June 2016 – Present

- Developed and launched content distribution API platform that lets anyone publish their content to Apple News, Facebook Instant Articles, Medium and other content platforms.
- Build server infrastructure with several web-heads, load balancers (HAProxy) and database replications.

Chapter Three – San Francisco, CA

Senior Drupal Developer, June 2015 – Present

- Integrated third-party systems (Built better integration with Click & Pledge in Drupal 8).
- Implemented Greenhouse Job Board API for Pinterest's Careers website.
- Integrated SSO (SimpleSAMLphp with ADFS and PingOne, OAuth2) for both D7 and D8.
- Performed database migrations (Bricolage to Drupal, MsSQL to Drupal using Migrate module).
- One of the principal developer of the Apple News Drupal 7 module and Apple News PHP library.
- Maintained and supported Drupal 7 and Drupal 8 sites (custom module development).

Education

Tyumen State University – Tyumen, Russia

Master's Degree in Computer Science, 2003 – 2009

- Emphasis on System Engineering and Information Technologies.

Hobbies

- I am building a new startup and learning iOS and Android development to solve paper usage problem for both people and companies.
- When time permits I am preparing myself to become a pilot.
- Built several successful open source projects (Wordpress and Drupal plugins)
- Oil painting and photography.

Numbers

Presshub.io, Inc

- Built content distribution platform and launched a company in **3** months. Currently I have a number of clients using it and the project supports itself.
- **50%** frontend development and **50%** backend development.

Chapter Three.

- At Chapter Three, I maintained about **220** websites.
- Migrated over **70** websites from .NET system to Drupal 7. And **1** from PostgreSQL to Drupal
- Wrote about **18** blog posts on a company website, including blog posts about Drupal 8.
- Over than **95%** of all projects launched on time.
- About **80%** of the time I am using PHP. I spend about **20%** of the time in frontend development.
