Summary

- Proven ability to jump into new projects and learn new technologies quickly.
- Proven ability to quickly create prototypes (proof of concept prototyping).
- Proven track record of initiating and delivering successful projects.
- Knows how to configure web servers, load balancers, master-master databases.

Professional Experience

Presshub.io – San Francisco, CA
Founder, June 2016 – Present

- Developed and launched content distribution API for publishers that lets anyone publish their content to Apple News, Facebook Instant Articles, Medium and other content publishing platforms. One unified API for all major social network and content publishing platforms.
- Built server infrastructure with several webheads, load balancers (HAProxy) and database replications.
  -

Chapter Three – San Francisco, CA
Senior Drupal Developer, June 2015 – Present

- Integrated third-party systems (e.g. Hubspot, AppleNews, Facebook, Twitter etc..).
- Implemented Greenhouse Job Board API for Pinterest.
- Integrated SSO (SimpleSAMLphp with ADFS and PingOne, Oauth) for both D7 and D8.
- Performed database migrations (Magento to Drupal, MSSQL to Drupal using Migrate module).
- One of the principal developers of the Apple News Drupal 7 module.
- One of the principal developers of the AppleNewsAPI PHP library.
- Maintained and supported Drupal 7 and Drupal 8 sites.

Urban Insight, Inc – Los Angeles, CA
Web Developer, September 2009 – June 2015

- Developed and maintained high-traffic blogs and news websites (NeonTommy.com, ATVN.org).
- Collaborated with client's developer teams to solve various project related problems.
- Performed internal semi-weekly code reviews of other developers to improve their code.
- Participated in internal kick-off project meetings and provided estimates.
- Presented various project overviews, technical details to other internal developers to enhance their skills.
- Performed database migration from various systems to Drupal.
- Optimized server load issues for various websites by optimizing MySQL queries and integrating various caching technologies such as Varnish, Memcached and Redis.
- Integrated Drupal with various third-party services such as Salesforce, Facebook, Twitter, Mailchimp, Google Maps, Constant Contact.
- Developed video courses platform (Planetizen Courses) for Urban Planners.

- Developed custom e-commerce system for Planetizen – urban planning news website.
- Implemented recurring payments with Authorize.net.
- Implemented various responsive and non-responsive Drupal themes.
- Developed data migration scripts to migrate sites to Pantheon and Acquia platforms.
- Technologies used include: LAMP (PHP 5, MySQL), HTML/XHTML, CSS, jQuery/Javascript, AngularJS, AJAX, Drupal 5, 6, 7, Wordpress, Memcached, Varnish, Redis, GIT, SVN.

Freelance
